| University of Texas at Dallas | May 2026 |
| Ph.D. in Public Policy and Political Economy | |
| <ul style="list-style-type: none">- Successfully Defended: April 2026- Dissertation: “Intertemporal Choice in Vaccination Timing: Evidence from a Discrete Choice Experiment in Wuhan”- Committee: Dohyeong Kim (Chair), Richard Scotch, Soyoung Kwon, Khai Chiong.- Distinction: Dean of Graduate Education Dissertation Research Award (2025). | |
| University of Texas at Dallas | May 2026 |
| M.S. in Social Data Analytics and Research | |
| University of Queensland | 2019 |
| Master of Development Economics | |
| University of California, Riverside | 2017 |
| B.A. in Economics | |

Research Agenda

My research builds, audits, and validates AI-driven behavioral simulation frameworks for policy evaluation. I anchor large language models to empirically-estimated choice frontiers through Behavioral Digital Twins (**build**), systematically evaluate the ideological priors embedded in LLM policy simulations (**audit**), and develop psychometric instruments for validating AI-generated preference measurements (**validate**). My work integrates discrete choice experiments, structural econometrics, and LLM-based simulation to advance computational decision science.

Working Papers

1. “**Empirical-Frontier Regularization for LLM Synthetic Agents: A Behavioral Digital Twin Framework**”
Working Paper — [SSRN Link](#). Submitted to AI and Economics (AIE) Summer Conference 2026. Developed a 3-stage framework integrating DCE data and Structural Causal Modeling (SCM) to align generative agents with empirical choice frontiers, achieving a 93% reduction in frontier-deviation MSE.
2. “**Value Contamination in Policy Simulation: Measuring How LLM Policy-Value Orientations Shape Predicted Administrative Burden Effects**”
Working Paper — [SSRN Link](#). Develops an audit framework for measuring value sensitivity in LLM-generated policy simulations. Using administrative burden in vaccination access as a testbed,

evaluates nine LLMs across six model families through policy-value orientation batteries, narrative frame-decomposition, and within-model frame-manipulation experiments.

3. **“Waiting Time as a Behavioral Barrier to Vaccination Uptake: Nonlinear Heterogeneity by Institutional Trust”**

Under Review at Economic Analysis and Policy — [Link to Full Draft](#)

- Developed a structural Discrete Choice Experiment (DCE) framework to analyze the interaction between temporal barriers and institutional trust in vaccination behavior.
- Identified nonlinear heterogeneity in waiting time sensitivity, providing a behavioral explanation for vaccine hesitancy.

4. **“The Price of Waiting: Evidence on Cash–Time Trade-Offs in Vaccination Time Discount”**

Manuscript in Preparation (Expected submission: August 2026) — Targeting *Social Science & Medicine*.

Research Experience & Affiliations

Doctoral Researcher, Spatial Health AI Research Partnership (SHARP), UT Dallas

- Leading interdisciplinary research on the intersection of artificial intelligence, geospatial analytics, and health policy.
- Managing large-scale datasets and developing computational simulations (R, Python) to evaluate pandemic preparedness.
- Leading development of the Behavioral Digital Twin (BDT) framework, integrating DCE data with causally-constrained LLM agents for synthetic policy simulation.

Graduate Researcher, Behavioral Health Economics Laboratory, UT Dallas

- Conducted high-salience behavioral experiments (N=1,027) analyzing risk-weighted health decisions and institutional trust.

Teaching Experience

Teaching Assistant, School of Economic, Political and Policy Sciences, UT Dallas

- **Quantitative Methods for Policy Analysis (Graduate):** Led Econometrics labs; specialized in R programming, regression analysis, and causal inference.
- **Health Economics & Public Policy (Undergraduate):** Developed case studies on health market failures and administrative challenges.
- **Public Policy Analysis (Undergraduate):** Mentored students in drafting evidence-based policy memos.

Conference Presentations

- **AI and Economics (AIE) Summer Conference 2026:** Empirical-Frontier Regularization for LLM Synthetic Agents.
- **APPAM Fall Research Conference 2025** (Seattle, WA): Estimating Time Discount Rate for Vaccination.
- **DAISY 2026 Workshop at ACM Conference on Health, Inference, and Learning (CHIL) 2026:** Behavioral Digital Twins — A Causally-Faithful Generative Framework.
- **UT Dallas Graduate Research Symposium 2025:** Modeling Vaccination Decisions with Hyperbolic Discounting.

Honors & Awards

- **2025** Dean of Graduate Education Dissertation Research Award, UT Dallas
- **2025** Betty & Gifford Johnson Graduate Travel Award, UT Dallas
- **2016** Omicron Delta Epsilon, International Honor Society for Economics

Technical Skills & Certifications

Econometrics: Mixed Logit (MXL), Latent Class Models (LCM), SEIR Modeling, Causal Inference.

AI & ML: PyTorch, Transformers (HuggingFace), LLM APIs (OpenAI, Anthropic), LangChain, Causal Machine Learning.

Software: Stata (Advanced), R, Python, MATLAB, LaTeX, SQL, GIS.

Certifications: Stanford Artificial Intelligence Graduate Certificate; CITI Human Subjects Protection.
